CONSTRUCTION CHEMISTRY

PRIMERS THAT ENSURE CLEAN RESULTS

Whether working with plasterboard, concrete or masonry, the construction chemistry product range from Protektor provides the perfect basis for achieving optimal results. Creating the proper substrate conditions is essential for any professional painting, plastering or wallpapering job. Protektor construction chemistry offers a product range that provides perfect priming tailored to the varied requirements of differing substrates. Our various primers ensure that you have a surface for all smooth, highly absorbent, poorly adhering or bleeding substrates. Water-based, solvent-free and eco-friendly bonding primers – for a professional result.

- ▶ **Betonkontakt (Concrete contact)** – Bonding coat on smooth. Concrete Bonding coat for gypsum plaster, gypsum-based render systems and and lime plaster.
- ▶ **Aufbrennsperre (Absorbent substrate primer)** – Reduces suction. Primer for substrates with high or varying absorbency.
- ▶ **Putzgrund (Plaster primer)** – white-pigmented bonding primer. Containing quartz e.g. before the application of decorative plasters.
- ▶ **Tiefengrund (Deep primer)** – solvent-free, unpigmented, deep penetrating primer. Primer for stabilising chalky and sandy substrates.
- ▶ **Sperrgrund (Barrier primer)** – isolating and sealing primer For sealing bleed-through substances e.g. for decorative plasters and renders.

PERFEKT VORBEREITET
PROTEKTOR BAUCHEMIE

Die Gipsarten, Beton oder Mauerwerk, mit Bauchaemie von Protektor haben Sie die Grundlage für ein gelingendes Ergebnis. Die Qualität der richtigen Untergrundvorbereitung ist ausschlaggebend für professionelles Maler-, Putz- und Tapezierarbeiten. Bauchaemie von Protektor bietet Ihnen die bestmögliche Grundlage für eine perfekte Ausführung abhängig von der jeweiligen Anforderung der jeweiligen Bauteile. Mit unserer unterschiedlichen Bauchaemie haben Sie jetzt die zuverlässige Lösung für alle glatten, stark saugenden, zu weitgehend oder durchlöchernden Untergründe: Betonmörtel, Sandputz und Anstrichputz.

- ✓ **Betonkontakt** – Haftbrücke auf glatten Beton
- ✓ **Aufbrennsperre** – Haftbrücke auf saugenden Untergründen
- ✓ **Putzgrund** – Quarzgefülltes Haftbrückenputzsystem
- ✓ **Tiefengrund** – Lösungsmittelfreie, ungelagerte Haftbrückenputzsysteme
- ✓ **Sperrgrund** – Isolation und Abdichtung

CONSTRUCTION CHEMISTRY

Item number	Description	Usage	Contents	Pallet contents
-------------	-------------	-------	----------	-----------------

Concrete Contact primer

Bonding bridge on an even floor. Bonding bridge for system plaster and adhesive binder on smooth concrete.

- alkali resistant
- red pigmentation
- for interiors
- ready to use or as a concentrate.

1440	Concrete Contact primer	200 - 300 g/m ²	20 kg	32 EIM
1441	Concrete Contact primer	200 - 300 g/m ²	6 kg	70 EIM

Primer absorb. substr.

Reduces absorbency. Apply primer to substrates with high or varying absorbency.

- high alkali-resistance
- red pigmentation
- for interiors and exteriors
- ready to use.

1442	Primer absorb. substr.	100 - 200 ml/m ²	15 L	32 EIM
1482	Primer absorb. substrate Concentrate	50 - 100 ml/m ²	15 L	32 EIM

Plaster base

Acrylic pigmented undercoat Bonding agent, e.g. prior to applying decorative plasters.

- evens the absorbency of the substrate
- breathable
- weatherproof
- for interior and exteriors
- ready to use and as a concentrate

1444	Plaster base	200 - 300 g/m ²	20 kg	32 EIM
1445	Plaster base	200 - 300 g/m ²	6 kg	70 EIM

Penetrating primer LF

Solution-free primer. Non-pigmented primer for strengthening chalky and sandy substrates.

- for mineral substrates
- reduces and evens out absorbency
- for interiors and exteriors
- ready to use.

1446	Penetrating primer LF	150 - 200 ml/m ²	10 L	50 KAN
1447	Penetrating primer LF	150 - 200 ml/m ²	5 L	96 KAN

CONSTRUCTION CHEMISTRY

Item number	Description	Usage	Contents	Pallet contents
-------------	-------------	-------	----------	-----------------

Barrier primer

Isolation and sealing primer. Primer for critical mineral, substrates that show through, e.g. for decorative plaster.

- specially made to prevent against bleeding materials
- improves mechanical bond
- white pigmentation
- for interiors and exteriors
- ready to use.

1448	Barrier primer	200 - 300 g/m ²	15 kg	32 EIM
1449	Barrier primer	200 - 300 g/m ²	6 kg	70 EIM
