

## LEAF STOP PROGRAMME

## FLEXIBLE & WEATHERPROOF

### **No more blocked rain gutters and downpipes**

Gutter and downpipe clogging caused by leaves blowing into them are not only a nuisance but can also cause considerable damage due to overflowing water. Removing leaves from the gutter takes time, is often dangerous and must be done regularly, especially in autumn.

With the light and flexible leaf stoppers from Protektor, leaves and foreign material no longer block the way to the drain, and the water can drain away unhindered.

Protektor leaf stoppers are removed from the gutter for cleaning, shaken out and reinserted.

Time-consuming cleaning and follow-up costs due to water damage repairs are a thing of the past.

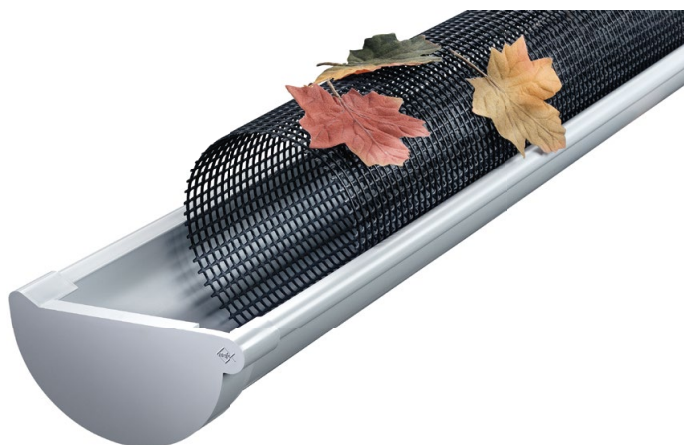

- ✓ LEAF TRAP GRID
- ✓ HEDGEHOG GUTTER BRUSH
- ✓ LEAF TRAP STRIPE

# LEAF STOP PROGRAMME FLEXIBLE & WEATHERPROOF

## LEAF TRAP GRID

- Available as a stick and as a roll
- Leaves remain on the roll, dry and are blown away
- Suitable for metal and synthetic gutters
- Weather-resistant polyethylene for long-lasting and durable use
- Material can easily be cut out at the outlet for optimal flow
- If there is no clamping effect from the roof covering, the leaf catcher grids must be fastened at intervals of 1 m.

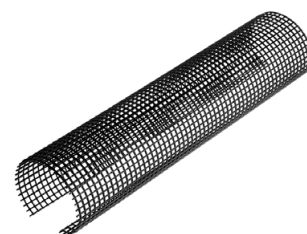

Item number	Material	Colour	Gutter size	Length (cm)	Packaging
-------------	----------	--------	-------------	-------------	-----------

### Leaf trap grid

Leaf trap grid roll material made of UV-resistant and impact-resistant PE for half-round gutters  
NW 100 / 8-piece and NW 125 / 7-piece.

**Notes:**  
Do not use plastic leaf catcher grids on purely metal roofs, as heat can develop if the roof is exposed to the sun for a long time.

85516	PE	90 black	NW 68	200	10 PCS
85517	PE	90 black	NW 83	200	10 PCS
85518	PE	90 black	NW 100 / NW 125	200, 300	10 PCS
85519	PE	90 black	NW 150 / NW 180	200, 300	10 PCS

### Leaf trap grid NW 100 + NW 125

Leaf trap grid on a roll, made of UV-resistant and impact-resistant PE for half-round gutters  
NW 100 / 8-piece and NW 125 / 7-piece.

**Notes:**  
Do not use plastic leaf catcher grids on purely metal roofs, as heat can develop if the roof is exposed to the sun for a long time.

85520	PE	90 black	NW 100 / NW 125	300	1 PCS
-------	----	----------	-----------------	-----	-------

- Leaf catcher grids are inserted into the gutter from above, not pushed in.
- Rolls can be preformed by hand.
- If the roofing does not have a clamping effect, the leaf catcher grids must be fastened at a suitable distance.

- The leaf catcher grid can be easily cut out at the water-outlet for optimum drainage.
- In case of extreme leaf loading and for cleaning, the leaf catcher grids can be removed from the gutter, shaken out and cleaned.

# LEAF STOP PROGRAMME FLEXIBLE & WEATHERPROOF

## LEAF TRAP STRIPE

- flat shape.
- Leaves remain on the strip, dry and blow away
- Weather-resistant polypropylene for long-lasting and durable use
- For metal and plastic gutters NW 100 to NW 150
- Simple installation by clipping onto the gutter bead and clamping under the roof tile

Item number	Material	Colour	Gutter size	Length (cm)	Packaging
-------------	----------	--------	-------------	-------------	-----------

### Leaf trap stripe

Leaf trap stripes made of UV-resistant and impact-resistant PP for half-round gutters NW 100 / 8-piece, NW 125 / 7-piece and NW 150 / 6-piece.

#### Notes:

Do not use leaf trapping strips made of synthetic material on purely metal roofs, as heat build-up can occur during permanent exposure to sunlight.

85558	PP	90 black	NW 100 / NW 125 / NW 150	100	30 PCS
85559	PP	BB grey	NW 100 / NW 125 / NW 150	100	30 PCS
85560	PP	BD brown	NW 100 / NW 125 / NW 150	100	30 PCS

### Leaf trap strips Display

Leaf trap stripes display as cardboard box

#### Notes:

The display box contains 60 m each of the colours black, grey and brown.

85564			NW 100 / NW 125 / NW 150	100	180 PCS
-------	--	--	--------------------------	-----	---------

- Leaf trap strips can be adapted to the width/depth of the gutter using commercially available PVC scissors.
- The rear part of the leaf trap strip must lie on the seam and is prevented from „opening up“ by the roof covering.
- If the roofing does not have a clamping effect, the leaf catcher strips must be fastened at a suitable distance.
- Assembly is carried out by pushing in from the front until the retaining clips snap into place on the bead.

# LEAF STOP PROGRAMME FLEXIBLE & WEATHERPROOF

## Hedgehog gutter brush

- Simple installation by inserting into the gutter
- Leaves remain on the gutter bead, dry and are blown away
- Smaller branches and moss remain caught in the bristles. The watercourse in the lower part of the gutter remains free
- Easy cleaning by shaking out the gutter bead
- Not suitable for copper gutters

## Hedgehog gutter brush

Hedgehog gutter brush  
for half-round gutters  
NW 100 / 8-piece and NW 125 / 7-piece.

**Notes:**  
Not suitable for copper gutters.

85562	90 black	NW 100 / NW 125	120	28 PCS
-------	----------	-----------------	-----	--------

- Hedgehog gutter brushes can be shortened with a standard metal saw or a pair of pliers.
- The installation is carried out by inserting them into the gutter.
- If the roofing does not have a clamping effect, the gutter beads must be fastened at a suitable distance.
- Hedgehog gutter brushes are not suitable for copper gutters.
- The gutter bead should be cleaned once a year by shaking it out under normal load.

## Leaf trap basket

Leaf trap basket for leaf protection for downpipes.

85415	PVC-U	BB grey	DN 75	8	50 PCS
85416	PVC-U	BB grey	DN 78 / DN 100	8	50 PCS
